****Attention Rockaway Beach Residents: Water Conservation Effort****

Hello Rockaway Beach Community,

We're reaching out to you with a brief update regarding our water supply. The water levels in Jetty Creek have dipped slightly due to lack of rainfall. We're kindly asking for your assistance in conserving water voluntarily until further notice.

Water remains safe for drinking; water quality has not been affected.

The curtailment aims to help balance supply and demand during this temporary situation.

Your actions matter! By reducing non-essential water activities like outdoor irrigation and car washing, you'll contribute to maintaining our water supply for critical needs. We truly appreciate your cooperation. If you have any questions, please contact Rockaway Beach Public Works.

Thank you for being a fantastic community!

Best regards,

City of Rockaway Beach
